

Abdominal Transplant Surgeon

FELLOWSHIP SURGICAL PROCEDURES

SURGICAL VOLUME REQUIREMENTS

Fellows are required to meet the following volumes over the course of their 24-month fellowship in order to receive a certificate of completion in the organ systems they matched into and the program is accredited to train in. Fellows must maintain a surgical log in Cobalt. This surgical log should be updated in a timely fashion and must be approved by the Fellowship Training Program Director bi-annually during the milestone assessment. Further details on the surgical log requirements can be found in the [Fellowship Training Requirements](#).

SURGICAL LOG PROCEDURE CATEGORIZATION

Below is a detailed outline of how each surgical log case is categorized. If fellows have any questions about how a case should be entered, they should consult with their Fellowship Training Program Director.

Fellow Case Entry

Transplant

Liver transplant
Kidney transplant
Pancreas transplant
Intestine transplant
Simultaneous pancreas and kidney transplant (SPK)
Simultaneous liver and kidney transplant (SLK)

Case Log Report

Primary category

Secondary category

Notes

→	Liver transplant		
→	Kidney transplant		
→	Pancreas transplant		
→	Intestine transplant		
→	Pancreas transplant	Kidney Transplant	
→	Liver transplant	Kidney Transplant	

Fellow Case Entry

Donor
