

RAPID ~ User Tips

1. **Launch Browser (recommended Mozilla) and connect** as default username and password
Username: YOURSERVERNAME\dbuser
(example: transplantvm\dbuser)

RAPID (Real-time Analysis and Process Improvement Dashboard) is a free and open-source software originally developed at Northwestern Medicine Comprehensive Transplant Center and distributed through the ASTS. RAPID provides outcomes and quality dashboards to individual transplant centers relevant to UNOS and SRTR reporting. The system is intended to be easily extensible and sufficiently generic to support any future evolution to center specific or SRTR reporting.

RAPID developers are interested in how you are using RAPID at your center! Please inform [us](#) about any projects or publications that use RAPID and we will announce them here!

RAPID Version 2015.2.0

2. Loading Files

You can load mutliply files (SRTR and UNOS) at the time or seperately.

Notes:

- 1) File names you are loading are irrelevant, the values you select/type are important (for instance release date for SRTR file).

RAPID ~ User Tips

Loading SRTR

- 1) Select appropriate Organ:
Kidney/Pancreas (will load Kidney file), Liver, Lung, Heart, Pancreas
 - 2) Select appropriate Release date.
Supported SRTR Cohort Releases:
2019-07-01
2019-01-01
2018-07-01
2018-01-01
2017-07-01
2017-01-01
2016-07-01
2016-01-01
2015-07-01
2015-01-01
2014-07-01
2014-01-01
2013-07-01
2013-01-01
 - 3) Check box "Is Official"
 - 4) Make sure Excel file is not protected
- Screen shot for SRTR load, for Kidney, Liver, Heart, Lung, Pancreas cohort release 2019-07-01
