Implementing Innovations in Perfusion Technology Surgical Skills Workshop

June 20, 2026

Tufts University
Health Sciences
Campus | Boston,
MA

Sponsorship Packages

Machine perfusion technology is rapidly advancing the field of transplantation by improving organ preservation, utilization, and outcomes. The ASTS Implementing Innovations in Perfusion Technology workshop is a one-day educational program designed to help transplant professionals translate these innovations into clinical practice.

Sponsorship of the workshop provides a valuable opportunity to support cutting-edge education while engaging directly with transplant leaders who are shaping the future of perfusion technology. Sponsors will receive a spotlight on their technology during a live demonstration session, offering all attendees the opportunity to learn how the machine works in a dedicated, educational setting.

All sponsorship packages will include acknowledgment on signage, slides, email blasts, social media, the ASTS website, and verbally during the meeting.

Bronze Level

\$7,000

- ✓ One additional complimentary registration
- ✓ Virtual bag insert
- ✓ Participation in the perfusion demo session (more information on the next page)

Silver Level *one opportunity available*

\$12,000

- ✓ Two additional complimentary registrations
- ✓ Virtual bag insert
- ✓ Participation in the perfusion demo session (more information on the next page)
- ✓ Sponsored lunch

Gold Level *one opportunity available*

\$17,000

- ✓ Three additional complimentary registrations
- ✓ Standalone email to attendees (sent by ASTS)
- ✓ Virtual bag insert
- ✓ Participation in the perfusion demo session (more information on the next page)
- ✓ Sponsored networking reception
